35%	s ineffective as a spray adjuvant	Con
100%	Total:	

Keep Out of Reach of Children Harmful if swallowed

Always consult the Safety Data Sheet for instructions on proper handling and storing.

Net Contents: 2 x 2.5 gallons

Nature's pHix is a soil adjuvant that contains organic acids. It includes organic carbon which can be used during application of surfactants or wetting agents. Regular use of Nature's pHix may contribute to the foundation of a healthy plant.

DIRECTIONS FOR USE

For Lawn Care, Sod and Sports Field

Apply 2-4 oz. per 1000 square feet once per month Mix Nature's pHix in 1-2 gallons of water per 1000 square feet

For Ornamentals and Arbor Care

Mix 1-2 quarts per 100 gallons of water For smaller areas, mix 2-4 ounces per gallon of water.

Nature's pHix is best applied alone. Blending Nature's pHix with solutions that neutralize its acidity may reduce its effectiveness. Mixing the product with any sulfate of phosphate containing materials is not recommended. Nature's pHix contains anionic biopolymers that are not compatible with cationic materials. Avoid pH sensitive pesticides. A jar test is always recommended to test compatibility Nature's pHix.

STORAGE AND DISPOSAL

Store in the original container in a cool dry, well-ventilated place, away from direct sunlight. Keep containers tightly closed when not in use and away from children, pets, and food products. Protect from extreme temperatures. Do not contaminate water, food or feed by storage or disposal. Do not store near acids or other acidic materials. Containers may be disposed of after thorough rinsing and offered for recycling or reconditioning or disposed of according to approved national and local regulations. Do not reuse empty containers.

PRECAUTIONS: Wash hands with soap and water before meals and after work. Information regarding the contents and levels of metals in this product is available on the internet at http://www.aapfco.org/metals.htm. Use this product in accordance with good agronomic practices, which include utilizing proven spray equipment set for proper coverage. Do not make applications when temperatures are too hot, as plant damage may occur. Applications should be made at temperature levels and when other environmental conditions in your area are such that your experience indicates the application will be compatible and will accomplish the desired result.
